Volume 39 (1996)

Obituary 1

Stacked generalization and simulated evolution
T.M. English (USA) 3–18
Fractal representation of the immune B cell repertoire
J.D. Burgos (Colombia) 19–24
A simple model for the statistics of events in idiotypic networks
E. Bonabeau (France) 25–34
Enzyme activity regulation by an outer physical signal
S.D. Varfolomeyev, N.F. Kazanskaya, N.L. Eremeev (Russia) 35–42
Oscillatory, stochastic and chaotic growth rate fluctuations in permittistatically controlled yeast cultures
H.M. Davey, C.L. Davey, A.M. Woodward, A.N. Edmonds, A.W. Lee, D.B. Kell (UK) 43–61
Smoothing representation of fitness landscapes — the genotype-phenotype map of evolution
T. Asselmeyer, W. Ebeling, H. Rosé (Germany) 63–76
Frequency analysis of amino acids in the recognition regions of T-cell receptors
F. Lara-Ochoa, J.C. Almagro, E. Vargas-Madrazo, I. Mendez (Mexico) 77–86
Intermittency route to chaos in a biochemical system
I.M. De la Fuente, L. Martinez, J. Veguillas (Spain) 87–93
Evolutionary strategies of stochastic learning automata in the prisoner's dilemma
E.A. Billard (Japan) 93–107
Sensitivity constraints in a chemical/biochemical highly responsive system
L. Acerenza (Uruguay) 109–116
The hypercube structure of the genetic code explains consesrvative and non-conservative aminoacid substitutions in vivo and in vitro
M.A. Jiménez-Montaño, C.R. de la Mora-Basáñez, T. Pöschel (México, Germany, USA) 117–125
The change of microtubule length caused by endogenous AC fields in cell
M.V. Satarić, R.B. Žakula, S. Zeković, J. Pokorny, J. Fiala (Yugoslavia, Czech Republic) 127–123
The effects of variable biome distribution on global climate
D.A. Noever, A. Brittain, H.C. Matsos, S. Baskaran, D. Obenhuber (USA) 135–141
Self-organization in computer simulated selective systems
S.P. Atamas (USA) 143–151

Effect of time lag on non-living resource in a simple food chain
D. Mukherjee, S. Ray, A.B. Roy (India) **153–157**
The origin of protein synthesis: On some molecular fossils identified through comparison of protein sequences
M. Di Giulio (Italy) **159–169**

Call for Papers **171**

Linear systems analysis of activating processes of complement system as a defense mechanism
H. Hirayama, K. Yoshii, H. Ojima, N. Kawai, S. Gotoh, Y. Fukuyama (Japan) 173–185
Electrodynamics of microtubular motors: the building blocks of a new model
E.M. Insinna, P. Zaborski, J. Tuszynski (France, Canada) 187–226
Zipf-scaling behavior in the immune system
J.D. Burgos, P. Moreno-Tovar (Colombia) 227–232
Membrane potential changes in activated cells: connection with cytosolic calcium oscillator
S.-I. Despa (România) 233–240
A model for temporal and intensity coding in insect olfaction by a network of inhibitory neurons
E. Av-Ron, J.-F. Vibert (France) 241–250
Singular perturbation analysis of a model for a predator-prey system invaded by a parasite
Y. Lenbury (Thailand) 251–262
Re-evaluating genetic algorithm performance under coordinate rotation of benchmark functions. A survey of some theoretical and practical aspects of genetic algorithms
R. Salomon (Switzerland) 263–278

Author index 279
Subject index 281–284
Volume contents 285–286
